

Fellow Students,

My name is Alex Stanton and I am campaigning for the seat in the Oregon State University House of Representatives. While at OSU students, myself included, are preparing for our future. We put hours upon hours into studying material to equip ourselves with knowledge to will help us shape the future. All of us want to make a difference during and beyond our time at OSU. Therefore, the fees that students pay to the ASOSU should represent the our dedication to creating a better world. To do this, the portion of fees allocated for building should be used to construct OSU into a more sustainable campus. The students at OSU will shape the future of our world. So why shouldn't we change OSU for the better?
