Meeting Minutes:

New committee priorities: Reach out to university and other sustainability groups about making sure that the existing infrastructure is up and working (existing lights). Emphasis on sustainable lighting. In addition, students should have an easier way of reporting lights that aren't working to the university, which is especially true for blue lights. A second priority will focus on trying to

implement lighting along western Washington Way, specifically the section that connects with 35th St. Emphasis should be on creating both normal lighting as well as a blue light, as well as a focus on environmental sustainability.
